

# Aireville Park Play Area Consultation

The Council has received 122 consultation results for the above survey, which it considers as a good return rate to give viable and valid survey question results. The Council wishes to thank everyone who took part and the time that people took to share their views on the proposed design. Below are the headline results.

82% and 84% of respondents felt that the new design had enough play experienced for very young children, young children and teenagers.

Over 75% of respondents liked the inclusion of sand and water play as well as how the Bandstand had been incorporated into the design.

Over 90% of respondents felt that the play area paths were in the right place and 80% liked the proposed different play surfaces.

The results for which 2 “Climbing” feature were as follows:

Climbing net, ropes and beams	63.4%
Climbing Boulder	51.5%
Pyramid Climber	34.7%
Dome Climber	33.7%

The results for which “Swing” play equipment were as follows@

Titan	38.9%
Tractor tyre swing	24.2%
Whirlwind	13.7%
Maypole	11.6%
Cross Scales	11.6%

The highest response rate was 93% in support of the proposed natural woodland play space under and around the blue cedar trees. Including welly walks, den building, balancing beams, tunnels, bridges, timber sculptures, seating and a tree house.

Over 75% of respondents were in support of the low knee rail and planting boundary, but there were several comments about how this would control dogs not getting into the play area.

Nearly 250 other comments were received about things that people liked or disliked, which will be used to fine tune the design to ensure people views are considered and the new play space addressed as many want, needs and dislikes as possible.

Thank you for taking part in the new play area consultation. If you wish to help any further, with things like fundraising for the project, then please contact Friends of Aireville Park [friendsofairesvillepark@gmail.com](mailto:friendsofairesvillepark@gmail.com)
